SHORT COMMUNICATION

## On the occurrence of *Audouinella chalybea* (Roth) Bory, 1823, a rare freshwater red algae (Florideophyceae: Acrochaetales: Audouinellaceae) from eastern Himalaya, India

Jai Prakash Keshri<sup>1</sup> & Jay Mal<sup>2</sup>

<sup>1,2</sup> Phycology Laboratory, Cas In Botany, The University of Burdwan, Golapbag, West Bengal 713104, India.

<sup>1</sup> keshrijp@gmail.com (corresponding author), <sup>2</sup> jaymal8942@gmail.com

**Abstract:** *Audouinella chalybea* (Roth) Bory has been recorded from Phamrong falls of Sikkim Himalaya. Well developed plants of the alga were found attached to the stones and pebbles in the running outlets of the falls. The plants were found anchored to the substratum by spine like base attachment cells. Such structure has not been recorded in earlier studies. Both monosporangia and tetrasporangia have been recorded in our plants. This is the first report of the species from eastern Himalaya and appears to be the second report from India.

**Keywords:** Himalayan hill alga, new report, Phamrong falls, Rhodophyta, Sikkim.

The genus *Audouinella* Bory is one of the infrequently recorded freshwater red alga known from running waters throughout the globe (Desikachary et al. 1990; Kumano 2002; John et al. 2011; Wehr et al. 2015). The thallus of this alga is tufty in appearance mostly up to 50 mm in height. Although blue coloured species are included in genus *Audouinella* Bory, many authorities doubts it to be "chantransia stage" of Batrachospermates as no carposporangia or gametangia have been observed (Necchi et al. 1993a,b; Necchi & Zucchi 1997; Pueschel et al. 2000; Sheath & Sherwood 2011). On the other hand Desikachary et al. (1990) have considered all freshwater species as *Audouinella* Bory while marine species as *Acrochaetium* Nageli.

The genus in India is represented by 12 species (Ganesan et al. 2018; Koley et al. 2020). During systematic investigations on the freshwater red algae of eastern Himalaya the authors recorded a good population of *Audouinella chalybea* (Roth) Bory from Sikkim Himalaya.

### MATERIAL AND METHODS

The specimens were collected from Phamrong falls of Sikkim. The alga was found growing on rocks under running water along with mosses & blue green algae in the month of April. The pH recorded at the time of collection was acidic (around 4.5–5) & temperature 19°C. The samples were preserved in 4% formalin solution. GWF solution (Glycerine:Water:Formalin::1:1:1) (Bando 1988) was used as mountant for the study. Preliminary observations were made under Olympus GB Microscope & Photomicrographic images were taken using Zeiss Axioscope A1 microscope attached with Axiocam 504 model digital camera.

### Systematic description

*Audouinella chalybea* (Roth) Bory, 1823

(Kumano 2002, p. 51, pl. 26, figs. 5–6)

*Pseudochantransia chalybea* (Roth) Brand, 1909

Thallus found growing on pebbles in running water of stream adhered to substratum possibly be spine like hyaline basal cell 107.75  $\mu\text{m}$  long & 7.67–8.18  $\mu\text{m}$  broad (Image 1C); penicillate forming bushy growth up to 3 mm in height, bluish-green in colour; well branched, branching unilateral & alternate both, up to 3<sup>rd</sup> order, mostly approaching height of the main axis; main axis distinct, cells of the main axis 7–13  $\mu\text{m}$  in diameter, 28–80  $\mu\text{m}$  long (4–7 times longer than broad); terminal cells rounded never acuminate; cells uninucleate with parietal chloroplast, dissected in mature cells as spiral ribbons; cell wall thin 1.03–1.30  $\mu\text{m}$ ; monosporangia abundant mostly unilaterally inserted towards the main axis on secondary and tertiary branched, globular to ellipsoid 10.05–12.43  $\mu\text{m}$  in diameter and 15.75–16.35  $\mu\text{m}$  long; tetrasporangia 13.37–15.19  $\mu\text{m}$  in diameter and 16.21–21.24  $\mu\text{m}$  long growing mostly at the tip of branches.

## DISCUSSION

Our specimen possesses notable characteristics of the species that was not mentioned in the plants described by Misra & Dey (1959). They have not observed the tetrasporangia. Moreover, occurrence of spine like hyaline basal cell is a new observation. This species was reported only once by Misra & Dey (1959) from Uttar Pradesh. Numerous sporangia were shown in the plant but no mention of tetrasporangia or other characteristics have been clearly spelt. Although the species is widely distributed recorded but has been recorded mostly from warm temperate regions (Hu & Wei 2006; Eloranta & Kwandras 2007; Eloranta et al. 2011; Ganesan et al. 2018; Guiry & Guiry 2022), it is surprising that no subsequent report of the species have been made from India. We have found well developed plants of the alga. The needle like basal attachment region recorded in present investigation has not been found in any other relevant literature. Therefore the possibility of the plant to be 'Chantransia Stage' comes under question mark because it should have a thalloid structure. Tetrasporangia were also found common. It may be the plant represents the diploid (sporophyte) phase of the plant. It is possible that the plants are maintaining its life cycle only in one stage in

Himalayan streams due to scarcity of opportunities of sexual reproduction. Study of the ploidy level of the plant and detail investigations may put new light in the understanding the taxonomic identity of the taxon.

The authors feel that plenty of freshwater red algae including this species may be obtained from several localities of Indian region specifically from Himalayan streams & rivers.

## CONCLUSION

The authors experienced that Himalayan streams and hills are rich in freshwater algal diversity but they are never abundant on their sites. Only experienced phycologists may locate the plants. So it appears that our knowledge of freshwater red algae is poor possibly due to lack of proper exploration and not due to the scarcity of occurrence. This is because few good papers have come up in last two decades.

Dr. Arkady Lelej, Russian Academy of Sciences, Vladivostok, Russia  
Dr. Simon Dowell, Science Director, Chester Zoo, UK  
Dr. Mário Gabriel Santiago dos Santos, Universidade de Trás-os-Montes e Alto Douro, Quinta de Prados, Vila Real, Portugal  
Dr. Grant Connette, Smithsonian Institution, Royal, VA, USA  
Dr. P.A. Azeez, Coimbatore, Tamil Nadu, India

#### Mammals

Dr. Giovanni Amori, CNR - Institute of Ecosystem Studies, Rome, Italy  
Dr. Anwaruddin Chowdhury, Guwahati, India  
Dr. David Mallon, Zoological Society of London, UK  
Dr. Shomita Mukherjee, SACON, Coimbatore, Tamil Nadu, India  
Dr. Angie Appel, Wild Cat Network, Germany  
Dr. P.O. Nameer, Kerala Agricultural University, Thrissur, Kerala, India  
Dr. Ian Redmond, UNEP Convention on Migratory Species, Lansdown, UK  
Dr. Heidi S. Riddle, Riddle's Elephant and Wildlife Sanctuary, Arkansas, USA  
Dr. Karin Schwartz, George Mason University, Fairfax, Virginia.  
Dr. Lala A.K. Singh, Bhubaneswar, Orissa, India  
Dr. Mewa Singh, Mysore University, Mysore, India  
Dr. Paul Racey, University of Exeter, Devon, UK  
Dr. Honnavalli N. Kumara, SACON, Anaikatty P.O., Coimbatore, Tamil Nadu, India  
Dr. Nishith Dharaiya, HNG University, Patan, Gujarat, India  
Dr. Spartaco Gippoliti, Socio Onorario Società Italiana per la Storia della Fauna "Giuseppe Altobello", Rome, Italy  
Dr. Justus Joshua, Green Future Foundation, Tiruchirappalli, Tamil Nadu, India  
Dr. H. Raghuvaran, The American College, Madurai, Tamil Nadu, India  
Dr. Paul Bates, Harison Institute, Kent, UK  
Dr. Jim Sanderson, Small Wild Cat Conservation Foundation, Hartford, USA  
Dr. Dan Challender, University of Kent, Canterbury, UK  
Dr. David Mallon, Manchester Metropolitan University, Derbyshire, UK  
Dr. Brian L. Cypher, California State University-Stanislaus, Bakersfield, CA  
Dr. S.S. Talmale, Zoological Survey of India, Pune, Maharashtra, India  
Prof. Karan Bahadur Shah, Budhanilkantha Municipality, Kathmandu, Nepal  
Dr. Susan Cheyne, Borneo Nature Foundation International, Palangkaraya, Indonesia  
Dr. Hemanta Kafley, Wildlife Sciences, Tarleton State University, Texas, USA

#### Other Disciplines

Dr. Aniruddha Belsare, Columbia MO 65203, USA (Veterinary)  
Dr. Mandar S. Paingankar, University of Pune, Pune, Maharashtra, India (Molecular)  
Dr. Jack Tordoff, Critical Ecosystem Partnership Fund, Arlington, USA (Communities)  
Dr. Ulrike Streicher, University of Oregon, Eugene, USA (Veterinary)  
Dr. Hari Balasubramanian, EcoAdvisors, Nova Scotia, Canada (Communities)  
Dr. Rayanna Helleni Santos Bezerra, Universidade Federal de Sergipe, São Cristóvão, Brazil  
Dr. Jamie R. Wood, Landcare Research, Canterbury, New Zealand  
Dr. Wendy Collinson-Jonker, Endangered Wildlife Trust, Gauteng, South Africa  
Dr. Rajeshkumar G. Jani, Anand Agricultural University, Anand, Gujarat, India  
Dr. O.N. Tiwari, Senior Scientist, ICAR-Indian Agricultural Research Institute (IARI), New Delhi, India  
Dr. L.D. Singla, Guru Angad Dev Veterinary and Animal Sciences University, Ludhiana, India  
Dr. Rupika S. Rajakaruna, University of Peradeniya, Peradeniya, Sri Lanka  
Dr. Bharat Baviskar, Wild-CER, Nagpur, Maharashtra 440013, India

#### Reviewers 2020–2022

Due to paucity of space, the list of reviewers for 2018–2020 is available online.

The opinions expressed by the authors do not reflect the views of the Journal of Threatened Taxa, Wildlife Information Liaison Development Society, Zoo Outreach Organization, or any of the partners. The journal, the publisher, the host, and the partners are not responsible for the accuracy of the political boundaries shown in the maps by the authors.

Print copies of the Journal are available at cost. Write to:  
The Managing Editor, JoTT,

OPEN ACCESS

The Journal of Threatened Taxa (JoTT) is dedicated to building evidence for conservation globally by publishing peer-reviewed articles online every month at a reasonably rapid rate at [www.threatenedtaxa.org](http://www.threatenedtaxa.org). All articles published in JoTT are registered under [Creative Commons Attribution 4.0 International License](#) unless otherwise mentioned. JoTT allows unrestricted use, reproduction, and distribution of articles in any medium by providing adequate credit to the author(s) and the source of publication.

October 2023 | Vol. 15 | No. 10 | Pages: 23931–24150

Date of Publication: 26 October 2023 (Online & Print)

DOI: [10.11609/jott.2023.15.10.23931-24150](https://doi.org/10.11609/jott.2023.15.10.23931-24150)

## Articles

### Echolocation call characterization of insectivorous bats from caves and karst areas in southern Luzon Island, Philippines

– Renz Angelo Duco, Anna Pauline de Guia, Judeline Dimalibot, Phillip Alviola & Juan Carlos Gonzalez, Pp. 23931–23951

### Seasonality, diversity, and forest type associations of macro moths (Insecta: Lepidoptera: Heterocera) in the Shiwalik landscape of northern India and its conservation implications

– Arun Pratap Singh & Lekhendra, Pp. 23952–23976

### Vertebrate assemblages on fruiting figs in the Indian eastern Himalaya's Pakke Wildlife Sanctuary

– Akangkshya Priya Gogoi, Janmejay Sethy, Awadhesh Kumar, Dipika Parbo, Murali Krishna Chatakonda & Ajay Maletha, Pp. 23977–23989

## Communications

### From the Arabian Peninsula to Indian shores: Crab Plover *Dromas ardeola* Paykull, 1805 (Aves: Charadriiformes: Dromadidae) breeding at Point Calimere, India

– H. Byju, N. Raveendran & K.M. Aarif, Pp. 23990–23995

### Assessing avian diversity and conservation status in Dighal Wetlands, Haryana, India

– Parul & Parmesh Kumar, Pp. 23996–24008

### Studies on the response of House Sparrow *Passer domesticus* to artificial nest-boxes in rural Arakkonam and Nemili taluks, Vellore District, Tamil Nadu, India

– M. Pandian, Pp. 24009–24015

### Threat assessment and conservation challenges for the herpetofaunal diversity of Dampa Tiger Reserve, Mizoram, India

– Sushanto Gouda, Ht. Decemson, Zoramkhuma, Fanai Malsawmdawngiana, Lal Biakzuala & Hmar Tlawmte Lalremsanga, Pp. 24016–24031

### Taxonomy and conservation status of swamp eels (Synbranchiformes: Synbranchidae) of West Bengal, India

– Ram Krishna Das, Pp. 24032–24042

### Sacred river of Pune: boon or bane for the diversity of aquatic beetles (Insecta: Coleoptera)

– Rita Deb, Pallavi Takawane & K.A Subramanian, Pp. 24043–24053

### Fine structure of sensilla on the proboscis of the Indian Honey Bee *Apis cerana indica* Fabricius (Insecta: Hymenoptera: Apidae)

– A.G. Suhas Krishna, Shamprasad Varija Raghu & Rajashekhar K. Patil, Pp. 24054–24062

### A compendium of *Aphelenchoides* (Fischer, 1894) (Nematoda: Tylenchina: Aphelenchoidea) nematodes with the description of a new species from Manipur, India

– Loukrakpam Bina Chanu & Naorem Mohilal, Pp. 24063–24078

### Efficacy of levamisole and oxyclozanide treatment on gastrointestinal nematodes of ungulates at the Central Zoo, Nepal

– Pratik Kiju, Amir Sadaula, Parbat Jung Thapa & Chiranjibi Prasad Pokheral, Pp. 24079–24085

### *Ocimum gratissimum* L. ssp. *gratissimum* var. *macrophyllum* Briq. (Lamiaceae: Nepetoideae: Ocimeae) a new record from northeastern India

– Mamita Kalita, Nilakshee Devi & Diganta Narzary, Pp. 24086–24091

### The study of biogeographic patterns of the genus *Parmotrema* in Wayanad District, Kerala with a new record in India

– Bibin Joseph, Edathum Thazhekuni Sinisha, Valiya Thodiyil Jaseela, Harshid Pulparambil & Nediyaparambu Sukumaran Pradeep, Pp. 24092–24103

## Review

### Diversity of Calliphoridae and Polleniidae (Diptera) in the Himalaya, India

– Meenakshi Bharti, Pp. 24104–24115

## Short Communications

### First photographic evidence of mange manifestation in Panna Tiger Reserve, India

– Supratim Dutta & Krishnamurthy Ramesh, Pp. 24116–24119

### New locality record of Forest Spotted Gecko *Cyrtodactylus (Geckoella) cf. speciosus* (Beddome, 1870) (Reptilia: Squamata: Gekkonidae) from Thanjavur, in the eastern coastal plains of Tamil Nadu, India

– Gopal Murali, Pp. 24120–24124

### Preliminary observations of moth (Lepidoptera) fauna of Purna Wildlife Sanctuary, Gujarat, India

– Preeti Choudhary & Indu Sharma, Pp. 24125–24130

### On the occurrence of *Audouinella chalybea* (Roth) Bory, 1823, a rare freshwater red algae (Florideophyceae: Acrochaetales: Audouinellaceae) from eastern Himalaya, India

– Jai Prakash Keshri & Jay Mal, Pp. 24131–24134

### Addition of four invasive alien plant species to state flora of Mizoram, India

– Lal Tlanhlui, Margaret Lalhlupuii, Sanatombi Devi Yumkham & Sandhyarani Devi Khomdram, Pp. 24135–24139

## Notes

### First sighting record of Western Reef-Heron *Egretta gularis* (Bosc, 1792) (Aves: Pelecaniformes: Ardeidae) from Jammu & Kashmir, India

– Parvaiz Yousuf, Semran Parvaiz, Nisheet Zehbi, Sabia Altaf, Showkat Maqbool, & Mudasir Mehmood Malik, Pp. 24140–24143

### Rare desmid genus *Bourrellyodesmus* Compère (Chlorophyceae: Desmidiales: Desmidiaceae) in India with description of a new species (*Bourrellyodesmus indicus* Das & Keshri sp. nov.) from eastern Himalaya, India

– Debjyoti Das & Jai Prakash Keshri, Pp. 24144–24147

### Threats faced by *Humboldtia bourdillonii* Prain (Magnoliopsida: Fabales: Fabaceae), an endangered tree endemic to the southern Western Ghats, India

– Jithu K. Jose & K. Anuraj, Pp. 24148–24150
